CUBO300

The new **IMET CUBO 300** is the result of a study aimed at maximum **protection** for the operator without forgetting the importance of total **accessibility**.

Both are basic features for a saw designed for the **contemporary** industry that is much more concerned about the security but at the same time wants to follow the pressing rhythms of the production. Even for this, **CUBO 300** has a strong structure but at the same time technological.

INDUSTRY 4.0 ready*, ready to be connected to digital systems that allow interconnectivity between the company systems and the improvement of the productive cycle. All this combined with a stylistic essential search and captivating style with simple and clear lines.
